

Contract Fermentation

Micro Solutions. Major Impact.

Our contract fermentation capabilities set a new standard for consistency and quality in the bioaugmentation industry.

- ISO 9001 : 2015 Certified
- Current Good Manufacturing Practices (cGMP) compliant
- FDA Registered - probiotic fermentation in human food and animal food additives

We formulate and blend high quality bacillus strains, as well as IP-owned microbes to deliver custom solutions.

As one of the most advanced microbial manufacturing plants in the nation, we provide:

- **Full technical lab** – we guarantee our high-yield strains to be contamination-free
- **Best-in-class equipment** – we research, develop, produce, and package all on-site
- **Technical Expertise** – researchers, scientists, engineers, and professionals collaborate to continually set a higher standard

Our dedicated team has the expert knowledge and technology to deliver customized spore-forming strains in a timely, cost-effective manner and at the precise scale needed.

One of a kind, every time.

To fit the needs of every customer, fermentation can be contracted per:

- 4,000-liter fermenter (aerobic) with high oxygen transfer rate
- 30,000-liter fermenter (aerobic) with high oxygen transfer rate
- Unit (kilogram of microbes at 100 billion CFU/gram)
